STATISTICS

The BGBL Board is working to transition Regular Season scoring and statistics from paper. We are working on partnering with a company that will allow for real-time statistics through the brand new BGBL website. This will eliminate the need for Coaches to send weekly statistics and allow for the player to quickly view following the game.

Other advantages of such a program:

- Better for environment with no paper use through I Pad system.
- Live game scoring that can be followed from anywhere.
- Game day scouting reports.
- Shot charts on players.
- Accuracy improvement.
- Time saving for Board to transfer statistics.

To Be Of Value Statistics Must Be Accurate & Immediate

DEFENSE!

Work on creating space from your defender. Scoring **against a defender** is all about forcing them to make a decision, then reacting to that decision.

Pay attention to your defender's feet, hands, and nose: their positioning can indicate how you

should handle the ball and give you opportunities to create space using jabs, jab steps, and crossovers. Use your shoulder against your defender's chest to leverage more space, making your body a shield between your defender and the ball.

A pull dribble is a simple tool for making defenders react, so you can read them and counter. If you pull dribble and your defender doesn't guard you tightly enough, you can use a Plyo step to explode past them. If the defender squares you up, you can step back into space to shoot. If the defender overcommits, you can counter and beat him or her in the opposite direction.

When creating space from a tight defender, focus on these three goals: **disrupting their balance**, **protecting the ball**, **and creating a driving lane to the basket**.
